Francisco Homes, Mulawin, SJDM Bulacan

Web Developer | IT Technical Support

<https://tristan-namingit.vercel.app>

PROFESSIONAL SUMMARY

Web developer with hands-on experience building responsive, secure web applications using HTML, CSS, Typescript, Javascript, React.js, Next.js, Node.js, and Supabase. Experienced in Progressive Web Apps, REST APIs, authentication, and database integration, with practical exposure to large language models (LLMs) and agentic harnesses. Comfortable leveraging AI-assisted development tools and open-source frameworks to accelerate delivery, improve code quality, and stay current with the fast-moving AI landscape. Strong problem-solving skills with practical experience in IT support and technical documentation.

PROJECTS

Xpense Web App

Personal Finance Progressive Web App

Tech Stack: JavaScript, HTML, CSS, Node.js, Supabase, JWT, bcrypt, Web Crypto API, IndexedDB, Service Workers, Chart.js, Groq API, Vercel

- Developed a secure expense tracking web application with calendar-based transaction logging, budget tracking, account balance management, and responsive navigation.
- Implemented user registration, login, password hashing, JWT sessions, protected API routes, CSRF protection, rate limiting, CORS controls, security headers, and request validation.
- Built encrypted cloud sync with Supabase using AES-GCM encryption, PBKDF2 key derivation, privacy controls, local storage fallback, service worker caching, and data backup/restore.
- Created financial dashboard views with Chart.js for spending trends, category breakdowns, weekly summaries, recent transactions, and monthly budget insights.
- Integrated an AI-assisted chat feature through a server-side proxy, powered by the Groq API, to help users review expenses and receive budgeting guidance.
- Leveraged AI-assisted development tools and agentic coding workflows throughout the build to accelerate feature delivery, speed up debugging, and maintain consistent code quality.

WORK EXPERIENCE

IT Intern (On-the-Job Training) | Skyline Hospital & Medical Center | 2026

- Diagnosed and resolved desktop hardware, peripheral, and printer-related issues, including driver and connectivity concerns.
- Managed IT asset inventory and provided end-user support for hardware, software, and basic system concerns.

TECHNICAL SKILLS

Web Development: HTML, CSS, Javascript, React.js, Next.js, Typescripts

Backend and Security: Node.js, REST APIs, JWT authentication, bcrypt, CSRF protection, rate limiting, CORS, payload validation

Database and Data Tools: Supabase, IndexedDB, Chart.js, Microsoft Office, Data Reporting, Dashboard Development

AI & LLM Tooling: Working knowledge of large language models (LLMs) and agentic harnesses; skilled in leveraging AI-assisted development tools to build more efficiently; up to date on emerging AI models and platforms including Claude, Codex, Qwen, DeepSeek, Hermes, GLM, and Kimi; experienced leveraging open-source tools and frameworks

IT Support: Laptop and Desktop Troubleshooting, Hardware Diagnostics, Printer Troubleshooting, Basic Software Support, End-User Assistance, IT Asset and Inventory Management, System Configuration, Technical Documentation, Microsoft Office, SAP S/4HANA

Professional Skills: Customer Service, Clear Verbal and Written Communication, Active Listening, Issue Resolution, Technical Support, Customer Assistance, Documentation, Team Collaboration, Requirements Following, Attention to Detail.

EDUCATION

STI College San Jose del Monte Bulacan

Tertiary Education | 2022-2026 (Cum Laude)

City of San Jose del Monte National Science High School

Senior High School | 2020-2022 (With High Honors)

City of San Jose del Monte National Science High School

Junior High School | 2017-2020 (With High Honors)

SOFT SKILLS

Communication, Customer Service, Active Listening, Patience, Problem Solving, Adaptability, Teamwork, Attention to Detail, Time Management, Accountability, Quick Learning, Willingness to Learn
